

PUBLIC TRANSPARENCY REPORT

2023

Maple-Brown Abbott Limited

Generated 15-12-2023

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2023 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Disclaimers

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2023 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

As an active investment manager focussed on listed equities, Maple-Brown Abbott Limited recognises that responsible investment enhances investment decision-making and ultimately leads to superior long-term value for all stakeholders. All our investment strategies integrate environmental, social and governance (ESG) considerations, with a clear purpose of reaching more informed decisions. This approach helps ensure that non-financial risks and opportunities are factored into the risk-return assessment of investments. We do not take a 'one size fits all' approach to ESG, with a key differentiator being our proprietary approach supported by specialist capability. Maple-Brown Abbott maintains in-house expertise for ESG research, with dedicated ESG analysts as members of the investment teams. We have developed proprietary ESG frameworks that are applied in strategy-relevant ways to supplement fundamental investment analysis.

Each investment team is responsible for ESG integration and engagement, drawing on our strong in-house analyst capabilities to incorporate ESG considerations into the investment decision-making process. We integrate ESG factors and risks into our investment approach at each step of the process. As part of this, we have developed proprietary frameworks to assess material ESG issues such as climate risk. These issues are then incorporated into factors including company valuations, confidence scores, or strength of governance. This process helps inform our investment decision making and portfolio construction.

A key component of our responsible investment framework is our stewardship program. As active investors we take our ownership responsibilities seriously and regularly engage with company boards and management to drive more sustainable long-term outcomes for both investors and the real economy. Engagement initiatives are the shared responsibility of portfolio managers and analysts, with insights incorporated into our investment research and portfolio decision-making.

In addition to factoring ESG insights into our investment processes, our specialist capability allows us to work with clients to create bespoke solutions that meet their specific ESG needs.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

In 2022 we continued to invest in our ESG capability, expanding the team with the addition of a new ESG Investment Analyst and reviewing our research tools and platforms. This included engaging a specialist data provider for the provision of climate-related analysis and to meet our ESG regulatory reporting requirements. We also reviewed and refreshed our proprietary ESG frameworks in a number of strategies to ensure ESG risks are being consistently and appropriately assessed.

During the year we undertook a strategic review of our existing responsible investment fund and re-launched it as a sustainably-themed investment fund, the Maple-Brown Abbott Australian Sustainable Future Fund. The Fund uses positive and negative screening to invest in companies we believe can deliver positive environmental or social outcomes aligned to one or more of our sustainable investment themes. The Fund is certified by the Responsible Investment Association of Australasia (RIAA).

Our continued involvement in industry collaborations such as Climate Action 100+, Investors Against Slavery and Trafficking Asia-Pacific and RIAA have provided us with access to best practice thinking and allowed us to advocate for change where it matters most. In 2022 we also become members of FAIRR, a collaborative investor network that raises awareness of the ESG risks and opportunities in the global food sector.

In addition to our collaborative stewardship activity, we continued our direct engagement with companies in the portfolio, details of which are covered in our annual Stewardship Report publication. Our stewardship includes company meetings, written correspondence, policy engagement and proxy voting, with engagement objectives set and tracked within each of strategies.

During the year we also published our Global Listed Infrastructure Decarbonisation Strategy which outlines our net zero commitment and action plan. The decarbonisation plan is aligned to our signatory status of the Net Zero Asset Managers Initiative which we joined in October 2021.

In December 2022 we undertook a review and refresh of our full suite of ESG policies with updates made to reflect currency of practice, and to cater for the breadth of investment strategies and additional ESG roles within the firm. Importantly, the Responsible Investment Policy also now formalises our approach to investment exclusions, providing stakeholders with clarity on the activities that we will not invest in.

We were pleased to have our endeavours reflected in the assessment we received from external benchmarking. For the fifth year in a row Maple-Brown Abbott was recognised as a 'Leader' amongst the 140 managers reviewed by RIAA and increased our overall score from previous years. Our Global Listed Infrastructure Strategy was also awarded Infrastructure fund of the year in the Environmental Finance's Sustainable Investment Awards 2022, and was rated AAA by MSCI ESG Research.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

Maple-Brown Abbott is continually reviewing and improving our approach to ESG. Over the coming two years we will continue to invest in our ESG capability, and progress our approach in the specific areas outlined below:

- Prepare and publish updated Climate Change Reports aligned to the recommendations of the Taskforce on Climate-related Financial Disclosures
- Initiate and lead a collaborative engagement focused on modern slavery under the Investors Against Slavery and Trafficking Initiative
- Join and support relevant industry initiatives to promote ESG outcomes
- Undertake a strategic review of ESG incorporation in select strategies

Section 4. Endorsement

'The Senior Leadership Statement has been prepared and/or reviewed by the undersigned and reflects our organisation-wide commitment and approach to responsible investment'.

Name

Sophia Rahmani

Position

CEO and Managing Director

Organisation's Name

Maple-Brown Abbott Limited

A

'This endorsement applies only to the Senior Leadership Statement and should not be considered an endorsement of the information reported by the above-mentioned organisation in the various modules of the Reporting Framework. The Senior Leadership Statement serves as a general overview of the above-mentioned organisation's responsible investment approach. The Senior Leadership Statement does not constitute advice and should not be relied upon as such. Further, it is not a substitute for the skill, judgement and experience of any third parties, their management, employees, advisors and/or clients when making investment and other business decisions'.

LABELLING AND MARKETING

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
OO 18	CORE	OO 11–14	OO 18.1	PUBLIC	Labelling and marketing	1

Do you explicitly market any of your products and/or funds as ESG and/or sustainable?

(A) Yes, we market products and/or funds as ESG and/or sustainable

Provide the percentage of AUM that your ESG and/or sustainability-marketed products or funds represent:

>0-10%

- (B) No, we do not offer products or funds explicitly marketed as ESG and/or sustainable
- (C) Not applicable; we do not offer products or funds

Additional information: (Voluntary)

The Maple-Brown Abbott Sustainable Future fund invests in Australian listed companies that we expect to positively contribute to a sustainable future. We use a negative and positive screening strategy, ESG integration and a comprehensive stewardship approach including company engagement and proxy voting. We apply a negative screen to our investment universe to exclude businesses that have material involvement in activities that detract from a sustainable future. We then apply a positive screen, further limiting the investment universe to companies that make a meaningful positive contribution to one or more of our sustainable investment themes. These themes are relevant to the Australian equity market and are informed by the UN Sustainable Development Goals.

PGS 4	PLUS	PGS 1	N/A	PUBLIC	Responsible investment policy elements	1 – 6

Does your formal responsible investment policy(ies) identify a link between your responsible investment activities and your fiduciary duties or equivalent obligations?

(A) Yes

Elaborate:

We believe ESG factors can materially impact investment performance over the long term. Companies that soundly manage ESG risks are more likely to be financially sustainable over time and therefore deliver better long-term returns. Consideration of ESG risks is a component of Maple-Brown Abbott’s risk management framework and incorporated into our investment processes. Reviewing ESG-related management practices and performance as part of fundamental investment analysis is not only prudent but also in line with Maple-Brown Abbott’s duty to optimise returns on behalf of investors.

(B) No

- (F) **Not applicable; we do not have a strategic asset allocation process**

STEWARDSHIP: OVERALL STEWARDSHIP STRATEGY

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 22	CORE	OO 8, OO 9	N/A	PUBLIC	Stewardship: Overall stewardship strategy	2

For the majority of AUM within each asset class, which of the following best describes your primary stewardship objective?

(1) Listed equity

(2) Fixed income

(A) Maximise our portfolio-level risk-adjusted returns. In doing so, we seek to address any risks to overall portfolio performance caused by individual investees' contribution to systematic sustainability issues.

(B) Maximise our individual investments' risk-adjusted returns. In doing so, we do not seek to address any risks to overall portfolio performance caused by individual investees' contribution to systematic sustainability issues.

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 23	PLUS	OO 5, OO 8, OO 9	N/A	PUBLIC	Stewardship: Overall stewardship strategy	2

How does your organisation, or the external service providers or external managers acting on your behalf, prioritise the investees or other entities on which to focus its stewardship efforts?

Our engagement program is prioritised around material ESG risks and opportunities identified in the investment decision-making process or in subsequent company actions. These material issues are considered alongside the company's ESG performance, proxy voting outcomes and/or Client consultation. We overlay this with themes-based engagement based on identified ESG factors with systemic influence including climate change and human rights. Engagement priorities and objectives are determined based on a company's ESG risk exposure and its management of risk, as well as any relevant thematic focus areas.

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 24	CORE	OO 8, OO 9	N/A	PUBLIC	Stewardship: Overall stewardship strategy	2

Which of the following best describes your organisation's default position, or the position of the external service providers or external managers acting on your behalf, concerning collaborative stewardship efforts?

- (A) We recognise the value of collective action, and as a result, we prioritise collaborative stewardship efforts wherever possible
- (B) We collaborate on a case-by-case basis
- (C) Other
- (D) We do not join collaborative stewardship efforts

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 24.1	PLUS	OO 8, OO 9	N/A	PUBLIC	Stewardship: Overall stewardship strategy	2

Elaborate on your organisation's default position on collaborative stewardship, or the position of the external service providers or external investment managers acting on your behalf, including any other details on your overall approach to collaboration.

Collaborative engagement initiatives are prioritised where we believe we can add value to the collaboration, have the ability to contribute to greater impact on ESG issues, have the potential to enhance and gain from the knowledge of other investors and the jurisdiction of the companies targeted by the collaboration. As a boutique manager, we are deliberate about the areas where we lend our weight and participate in select collaborations and industry initiatives whose outcomes are aligned to the best interests of our clients. We believe that investor advocacy is integral to achieving sustainable financial outcomes and our participation in ongoing collaborative engagements reflects our thematic engagement areas of climate change and human rights.

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle

- 4
- 5

(E) Formal collaborative engagements, e.g. PRI-coordinated collaborative engagements, Climate Action 100+, or similar

Select from the list:

- 2
- 4
- 5

(F) We do not use any of these channels

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 27	PLUS	OO 8, OO 9	N/A	PUBLIC	Stewardship: Overall stewardship strategy	2

How are your organisation’s stewardship activities linked to your investment decision making, and vice versa?

MBA's company engagement and proxy voting activities are undertaken by our investment analysts, in conjunction with our Portfolio Managers and specialist ESG analysts, and information obtained in these activities is systematically incorporated into our investment analysis and decision-making processes. In addition, each analyst keeps a detailed record of their engagement activities that is accessible by all investment professionals, including portfolio managers, relevant to that strategy.

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 28	PLUS	OO 8, OO 9	N/A	PUBLIC	Stewardship: Overall stewardship strategy	2

If relevant, provide any further details on your organisation's overall stewardship strategy.

Our stewardship strategy applies to equities that are directly managed by Maple-Brown Abbott, where we have the greatest ability to implement affect change. We also consider ESG capabilities, including engagement policies, in the appointment and evaluation of external fund managers appointed to manage assets on behalf of Maple-Brown Abbott.

STEWARDSHIP: (PROXY) VOTING

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 29	CORE	OO 9, PGS 1	N/A	PUBLIC	Stewardship: (Proxy) voting	2

When you use external service providers to give recommendations, how do you ensure those recommendations are consistent with your organisation's (proxy) voting policy?

(A) Before voting is executed, we review external service providers' voting recommendations for controversial and high-profile votes

Select from the below list:

- (1) in all cases**
- (2) in a majority of cases
- (3) in a minority of cases

(B) Before voting is executed, we review external service providers' voting recommendations where the application of our voting policy is unclear

Select from the below list:

- (1) in all cases**
- (2) in a majority of cases
- (3) in a minority of cases
- (D) We do not review external service providers' voting recommendations
- (E) Not applicable; we do not use external service providers to give voting recommendations

- (B) We publicly disclosed details of our engagements with policy makers

Add link(s):

<https://download.maple-brownabbott.com/documents/Reports/Stewardship-report>

<https://download.maple-brownabbott.com/documents/Reports/GLI-Engagement-and-stewardship-report-2022>

- (C) No, we did not publicly disclose details of our engagement with policy makers conducted as part of our responsible investment approach during the reporting year

STEWARDSHIP: EXAMPLES

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 40	PLUS	OO 8, OO 9	N/A	PUBLIC	Stewardship: Examples	2

Provide examples of stewardship activities that you conducted individually or collaboratively during the reporting year that contributed to desired changes in the investees, policy makers or other entities with which you interacted.

(A) Example 1:

Title of stewardship activity:

Direct engagement: Viva Energy

(1) Led by

- (1) Internally led
- (2) External service provider led
- (3) Led by an external investment manager, real assets third-party operator and/or external property manager

(2) Primary focus of stewardship activity

- (1) Environmental factors
- (2) Social factors
- (3) Governance factors

(3) Asset class(es)

- (1) Listed equity
- (2) Fixed income
- (3) Private equity
- (4) Real estate
- (5) Infrastructure
- (6) Hedge funds
- (7) Forestry
- (8) Farmland
- (9) Other

(4) Description of the activity and what was achieved. For collaborative activities, provide detail on your individual contribution.

As an energy company, Viva Energy (VEA) is highly exposed to both the risks and opportunities of climate transition. The company has published an Energy Transition Strategy which outlines focus areas and emissions reduction goals, and we met with the company to seek increased detail and transparency on its transition roadmap as well as a discussion on human capital.

VEA has three stated decarbonisation goals, including group net zero by 2050, net zero by 2030 for non-refining, and 10% emissions intensity reduction for refining by 2030. Outside of the refinery the goals will be largely met through purchased energy, with the refinery's 10% emissions reduction to come from a suite of efficiency projects. We welcome the company's ambition in this area, however we would ideally like to see VEA's targets expressed as firm commitments with costed pathways and supporting executive KPI and remuneration structures.

The changing energy system presents opportunities as well as risk, and VEA is pursuing a number of initiatives in this area, most notably its New Energies Service Station which is expected to commence operations late 2023. The development is being undertaken with strategic customers and partners and will be Australia's first publicly accessible service station that offers commercial scale, hydrogen refuelling for heavy HFCEVs. We see this as a positive development for the company, alongside its Carbon Solutions customer offering, another partnering initiative which supports commercial customers in achieving their carbon emission reduction objectives.

Besides climate risk, we were keen to get more information from the company on its recent increase in reportable safety matters and its plans to improve safety performance. VEA outlined its process refresh and recommitment to safety goals, noting that it has seen some improvement in the last two quarters. The company does not link its significant increase in employee turnover to the decline in safety performance but does forecast challenges in labour availability given the current macro environment.

- (2) External service provider led
- (3) Led by an external investment manager, real assets third-party operator and/or external property manager

(2) Primary focus of stewardship activity

- (1) Environmental factors
- (2) Social factors
- (3) Governance factors

(3) Asset class(es)

- (1) Listed equity
- (2) Fixed income
- (3) Private equity
- (4) Real estate
- (5) Infrastructure
- (6) Hedge funds
- (7) Forestry
- (8) Farmland
- (9) Other

(4) Description of the activity and what was achieved. For collaborative activities, provide detail on your individual contribution.

In December 2022 we engaged with Genting Berhad, a Malaysian holding company for several businesses, including a casino and resorts operating business on which the engagement was focussed. Given the nature of Genting Berhad's businesses we see material ESG risks facing the company, including responsible gaming, anti-money laundering (AML) and regulatory risks, climate change, waste management and human capital, and we were keen to understand the company's response to these issues. Genting Berhad emphasized that each of the underlying businesses are subsidiaries that operate independently and oversee most of their ESG policies and procedures and initiatives with some guidance from the holding company. This reflects the licensing arrangements in place, where the holding company holds the business license for the subsidiaries; however it is the subsidiaries themselves that hold the casino licenses and that therefore engage with their respective governments. This removes the direct responsibility from the parent company to some degree, which was evident in the discussion we held with Genting Berhad. With respect to questioning on responsible gaming, for example, Genting Berhad state that it has been both practising and encouraging responsible gaming since inception, however aside from an example of employee training to identify problem gamblers no other tangible evidence was provided. We were also not given comfort around AML controls as the company was not able to point to concrete examples of any initiative in place, are no management KPIs are tied to AML. Similarly on the topic of environmental risk, each resorts business has its own targets regarding emissions which in turn follow the government's targets in the region it is located. Waste is also managed at the subsidiary level but the company as a whole practice reduce, reuse, and recycle. The Singapore operations are planning to reduce landfill by 50% by 2030 and are working with the Singapore government. The resorts have waste targets in Singapore, but no targets are yet in place for the less-mature Las Vegas business, nor are there targets in place for Malaysia. The holding company emphasized that this is a bottom-up approach, whereby subsidiaries give the holding company feedback on how they want to manage ESG matters..

We note the obvious challenges inherent in a holding company structure, however ideally we would like to see a firm-wide approach to ESG, with minimum standards and consistent principles in place, along with effective Board oversight. We also have concerns that the company uses consultants for its sustainability reporting but does not use the published industry terms and language internally and are therefore unable to provide data on certain metrics – for example, contracts that include human rights clauses. A common theme throughout the engagement was debate on what certain terms in the sustainability industry mean and we would like the company to use the accepted industry terminology. The company is moving to integrated reporting and have engaged consultants to advise them on the process. We hope that this will give rise to a more informed conversation on ESG and will look to meet with the company again once the new reporting is in place.

(C) Example 3:

Title of stewardship activity:

Direct engagement: Ansell

(1) Led by

- (1) Internally led
- (2) External service provider led
- (3) Led by an external investment manager, real assets third-party operator and/or external property manager

(2) Primary focus of stewardship activity

- (1) Environmental factors
- (2) Social factors
- (3) Governance factors

(3) Asset class(es)

- (1) Listed equity
- (2) Fixed income
- (3) Private equity
- (4) Real estate
- (5) Infrastructure
- (6) Hedge funds
- (7) Forestry
- (8) Farmland
- (9) Other

(4) Description of the activity and what was achieved. For collaborative activities, provide detail on your individual contribution.

In August 2022 migrant workers at a Malaysian glove maker filed a lawsuit in the United States against Ansell Ltd (ANN), accusing the manufacturer of "knowingly profiting" from use of forced labour in its supply chain. We met with ANN to seek further insight on the company's response and to press for continued improvements in standards and frameworks. Noting that at the time of meeting no date had been set for the case to be heard in the US courts, ANN strongly refute the allegations, and emphasised its focus on embedding a risk-based Supplier Management Framework (SMF) with three stages of external review and SEDEX and Elevate supplier audits on 99% of outsourced supply spend in Malaysia. Learnings from these audits are continuing to be implemented, with changes including on-site hostel visits, overtime and rest day compliance. ANN noted progress across the broader Malaysia glove industry with payback of recruitment fees (US\$30m returned to 18,000+ migrant workers) and the establishment of the Responsible Glove Alliance. Under the SMF, ANN has terminated three suppliers in recent years, including Top Glove, following unsuccessful engagement and remediation. The company stressed the scrutiny it continues to place on addressing forced labour issues, however was also at pains to point out that it doesn't want to claim leadership in labour standards as a competitive advantage.

We also questioned ANN on its decarbonisation goals, where the company is seeking first mover advantage in its scope 1 and 2 emissions reduction targets (42% by 2030 and net zero by 2040). We are pleased to see ANN being informed by the SBTi policy in this endeavour, particularly in regard to not relying on purchasing offsets. Whilst the company has stopped short of SBTi aligned targets it is expected this will come in the near future. With scope 3 emissions accounting for 80% of ANN's total emissions we questioned the company on its plans, with ANN responding that scope 3 targets will be defined within the next two years. ANN is progressing sustainable product design, with 'green' gloves and other product lines seen as an area of differentiation, albeit with a price premium which the company does not foresee as a major barrier to take up. We were also pleased to see company progress focus on water and waste initiatives, having committed to Zero Landfill Waste for all its plants by 2023, diverting 99% of waste away from landfills.

Overall we expect the increased scrutiny on ANN's supply chain to improve labour standards more broadly, and welcome the efforts the company has taken to progress its sustainability agenda.

(D) Example 4:

Title of stewardship activity:

Direct engagement: Incitec Pivot

(1) Led by

- (1) Internally led
- (2) External service provider led
- (3) Led by an external investment manager, real assets third-party operator and/or external property manager

(2) Primary focus of stewardship activity

- (1) Environmental factors
- (2) Social factors
- (3) Governance factors

(3) Asset class(es)

- (1) Listed equity
- (2) Fixed income
- (3) Private equity
- (4) Real estate
- (5) Infrastructure
- (6) Hedge funds
- (7) Forestry
- (8) Farmland
- (9) Other

(4) Description of the activity and what was achieved. For collaborative activities, provide detail on your individual contribution.

As part of our continued assessment of the sustainability governance of the companies we invest in, we regularly review the remuneration structures of portfolio companies. Of late we have become increasingly interested in whether companies that have set decarbonisation targets are supporting these commitments with embedded KPIs linked to executive rem. This was highlighted during the quarter when engaged with Incitec Pivot (IPL) on their Climate Change / Decarbonisation Strategy and Reporting. We note that a key positive for IPL, in addition to high quality climate disclosure and a detailed discussion on Scope 3 emissions, is the linking of executive rem to climate targets. We will continue to discuss this approach with the companies we meet in, and press for continued inclusion of executive KPIs that support decarbonisation commitments.

(E) Example 5:

Title of stewardship activity:

Direct engagement: Cheniere Energy

(1) Led by

- (1) Internally led
- (2) External service provider led
- (3) Led by an external investment manager, real assets third-party operator and/or external property manager

(2) Primary focus of stewardship activity

- (1) Environmental factors
- (2) Social factors
- (3) Governance factors

(3) Asset class(es)

- (1) Listed equity
- (2) Fixed income
- (3) Private equity
- (4) Real estate
- (5) Infrastructure
- (6) Hedge funds
- (7) Forestry
- (8) Farmland
- (9) Other

(4) Description of the activity and what was achieved. For collaborative activities, provide detail on your individual contribution.

Cheniere is a producer and exporter of liquefied natural gas (LNG) in the US. We met with Cheniere after the company could not answer our greenhouse gas (GHG) emissions questionnaire owing to an absence of emissions targets. When we met, the company said it was a longstanding and vocal supporter of the Paris Agreement and believes that LNG is playing, and will continue to play, a significant role in limiting global warming. While the company has kicked off some initiatives such as LNG shipment offsetting, tagging lifecycle cargo emissions and contributing to academic research, we believe substantial progress is still needed to demonstrate how climate risks are managed and emissions are mitigated, particularly in relation to methane emissions.

We highlighted the IEA Net Zero by 2050 (Net Zero) scenario, where natural gas shows a modest decline out to 2030 and declines quickly after that. Cheniere said it had undertaken scenario analysis using other IEA models and felt the NZ scenario lacked detail and had no plans to revisit these disclosures in the short term. Our analysis suggests US LNG exports could remain robust under the faster transition scenarios owing to the increasing need for gas to help decarbonisation efforts in emerging economies. However, under the Net Zero scenario, we see a material negative valuation impact. We pressed Cheniere to update its analysis with the NZ assumptions to better account for the implications of a net zero world. Cheniere has updated its capital allocation framework to include a climate component but does not use an internal price on carbon to guide investments. We would like the company to better demonstrate how it factors the pace of the energy transition and its commitment to the Paris Agreement into investment decisions. For a relatively 'young' and well-resourced company with a stated commitment to the goals of the Paris Agreement, it is disappointing to see Cheniere lagging on its climate change strategy. We voted against Cheniere's executive remuneration report at the 2022 AGM due to a lack of climate-change-related objectives in short- and long-term incentive plans.

CLIMATE CHANGE

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 41	CORE	N/A	PGS 41.1	PUBLIC	Climate change	General

Has your organisation identified climate-related risks and opportunities affecting your investments?

(A) Yes, within our standard planning horizon

Specify the risks and opportunities identified and your relevant standard planning horizon:

- changing government energy and climate policies and regulation such as tougher emissions and energy efficiency standards and carbon pricing;
- changes in customer demand; and
- near term physical impacts of acute and chronic weather events.

(B) Yes, beyond our standard planning horizon

Specify the risks and opportunities identified and your relevant standard planning horizon:

- continued evolution of tougher government energy and climate policies;
- changing patterns of investment, production, demand and growth; and
- progressive physical impacts of acute and chronic weather events.

(C) No, we have not identified climate-related risks and/or opportunities affecting our investments

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 41.1	CORE	PGS 41	N/A	PUBLIC	Climate change	General

Does your organisation integrate climate-related risks and opportunities affecting your investments in its overall investment strategy, financial planning and (if relevant) products?

(A) Yes, our overall investment strategy, financial planning and (if relevant) products integrate climate-related risks and opportunities

Describe how climate-related risks and opportunities have affected or are expected to affect your investment strategy, financial planning and (if relevant) products:

In determining the fair value of a company, Maple-Brown Abbott maintains strategy-relevant financial models which typically consider long-term earnings and cashflow forecasts. Climate change risks and opportunities, along with other ESG factors have the potential to impact investment risks and returns, and we factor these into our investment analysis.

We consider both transitional and physical climate risks in our climate risk analysis and investment decision making. We consider transition risks to be those that arise from the policy, regulation, market and technology and changing customer preferences. We consider physical risks to be those that arise from the physical effects of climate change. Physical climate risks include both acute and chronic risks. Acute risks are event driven risks such as increased severity of extreme weather events, for example, cyclones. Chronic risks refer to longer term changes in climate patterns such as sustained higher temperatures that may cause sea level rises or chronic heat waves.

We take near and longer-term risks beyond the term of our investment horizon into account. There is a large spectrum of longer-term risks and opportunities. These range from the best-case scenario, where there is an orderly transition to a low carbon economy, and in the worst-case scenario, where there is social, political and economic disorder owing to a disorderly approach to decarbonisation and of the heightened effects of physical climate change.

- (B) No, our organisation has not yet integrated climate-related risks and opportunities into its investment strategy, financial planning and (if relevant) products

Has your organisation assessed the resilience of its investment strategy in different climate scenarios, including one in which the average temperature rise is held to below 2 degrees Celsius (preferably to 1.5 degrees Celsius) above pre-industrial levels?

- (A) Yes, using the Inevitable Policy Response Forecast Policy Scenario (FPS) or Required Policy Scenario (RPS)
- (B) Yes, using the One Earth Climate Model scenario
- (C) Yes, using the International Energy Agency (IEA) Net Zero scenario
- (D) Yes, using other scenarios
- (E) No, we have not assessed the resilience of our investment strategy in different climate scenarios, including one that holds temperature rise to below 2 degrees

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 44	CORE	N/A	N/A	PUBLIC	Climate change	General

Does your organisation have a process to identify, assess, and manage the climate-related risks (potentially) affecting your investments?

- (A) Yes, we have a process to identify and assess climate-related risks
 - (1) Describe your process

Maple-Brown Abbott considers that climate change risks and opportunities have the potential to impact investment risks and returns and as such, need to be considered in company assessment and investment decision making. Maple-Brown Abbott's climate change risk assessment is aligned with the recommendations of the TCFD and considers the following factors across transition and physical risks and opportunities in assessing climate change exposure:

- company climate change governance and strategy;
- revenue exposure to carbon and potential for asset stranding given the impact of government energy and climate policies on consumer preferences, market demand and growth, changing patterns of investment and production, and adaptive capacity;
- cost exposure and potential impact of carbon pricing owing to changes in government energy and climate policies, including tougher emissions and energy efficiency standards, and adaptive capacity;
- social license to operate and reputational considerations; and
- chronic and acute physical climate impacts at the asset and system level.

In select strategies and where material, company valuations are further assessed against a range of carbon transition scenarios. Where possible, carbon transition scenarios are explicitly factored into company's earnings forecasts, through adjustments to revenue, cost, earnings, capex, cashflow or balance sheet items, or implicitly through the determination of the terminal value, discount rate or perpetuity growth rates.

- (2) Describe how this process is integrated into your overall risk management

This climate change analysis, and any resultant scenario analysis valuation impact, is discussed in the research report and at the research meeting. The findings are incorporated into portfolio construction decisions and portfolio manager trading. This process of climate change-related integration ensures that climate change risks and opportunities are systematically factored into the risk-return assessment, where relevant, and that where companies are exposed to climate change risks, the forecast return is sufficient to compensate for the risk. The analysis is generally undertaken in sectors with higher exposure to climate risk such as mining, energy, industrials, infrastructure, banking and insurance.

(B) Yes, we have a process to manage climate-related risks

(1) Describe your process

We believe companies that demonstrate strong climate risk management credentials, report progress transparently and strategically position themselves to tap into the opportunities of a low carbon world are more likely to deliver long-term sustainable returns. Our climate risk assessments inform our view and integrated into portfolio construction and are also instrumental in informing our risk management action which may be one of engagement, portfolio rebalance, or divestment.

(2) Describe how this process is integrated into your overall risk management

Climate-related data and analysis is one of several inputs into our overall risk management within a broad spectrum of ESG factors. To develop our knowledge and understanding of climate risks and opportunities within the investment team we facilitate training and access to specialist information providers for all investment roles. We have also run a deep dive Board education session on climate risk management.

- (C) No, we do not have any processes to identify, assess, or manage the climate-related risks affecting our investments

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle

Has your organisation taken action on any specific sustainability outcomes connected to its investment activities, including to prevent and mitigate actual and potential negative outcomes?

- (A) Yes, we have taken action on some of the specific sustainability outcomes connected to our investment activities
- (B) No, we have not yet taken action on any specific sustainability outcomes connected to our investment activities

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 48.1	PLUS	PGS 48	N/A	PUBLIC	Sustainability outcomes	1, 2

Why has your organisation taken action on specific sustainability outcomes connected to its investment activities?

- (A) We believe that taking action on sustainability outcomes is relevant to our financial risks and returns over both short- and long-term horizons
- (B) We believe that taking action on sustainability outcomes, although not yet relevant to our financial risks and returns, will become so over a long-time horizon
- (C) We have been requested to do so by our clients and/or beneficiaries
- (D) We want to prepare for and respond to legal and regulatory developments that are increasingly addressing sustainability outcomes
- (E) We want to protect our reputation, particularly in the event of negative sustainability outcomes connected to investments
- (F) We want to enhance our social licence-to-operate (i.e. the trust of beneficiaries, clients, and other stakeholders)
- (G) We believe that taking action on sustainability outcomes in parallel to financial return goals has merit in its own right
- (H) Other

HUMAN RIGHTS

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 49	PLUS	PGS 47	PGS 49.1	PUBLIC	Human rights	1, 2

During the reporting year, what steps did your organisation take to identify and take action on the actual and potentially negative outcomes for people connected to your investment activities?

(A) We assessed the human rights context of our potential and/or existing investments and projected how this could connect our organisation to negative human rights outcomes

Explain how these activities were conducted:

We assess human rights impacts as a key input to our overall ESG assessment as part of the investment decision-making process. Maple-Brown Abbott is also a member of the Investors Against Slavery & Trafficking Asia-Pacific (IAST APAC) investor collaboration which provides access to knowledge and education as well as collaborative engagement with at-risk companies.

- (B) We assessed whether individuals at risk or already affected might be at heightened risk of harm
- (C) We consulted with individuals and groups who were at risk or already affected, their representatives and/or other relevant stakeholders such as human rights experts
- (D) We took other steps to assess and manage the actual and potentially negative outcomes for people connected to our investment activities
 - (E) We did not identify and take action on the actual and potentially negative outcomes for people connected to any of our investment activities during the reporting year

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 49.1	PLUS	PGS 49	N/A	PUBLIC	Human rights	1, 2

During the reporting year, which stakeholder groups did your organisation include when identifying and taking action on the actual and potentially negative outcomes for people connected to your investment activities?

(A) Workers

Sector(s) for which each stakeholder group was included

- (1) Energy**
- (2) Materials
- (3) Industrials
- (4) Consumer discretionary**
- (5) Consumer staples**
- (6) Healthcare
- (7) Finance
- (8) Information technology**

PGS 49.2	PLUS	PGS 47	N/A	PUBLIC	Human rights	1, 2

During the reporting year, what information sources did your organisation use to identify the actual and potentially negative outcomes for people connected to its investment activities?

(A) Corporate disclosures

Provide further detail on how your organisation used these information sources:

We use corporate disclosures as a key input into our investment research. We review corporate disclosures to understand the steps a company has taken to assess and manage its impact on human rights. We pay particular attention to companies' Modern Slavery statements.

(B) Media reports

Provide further detail on how your organisation used these information sources:

We review media reports as an additional source of information to identify risk associated with a particular company or sector in regard to its exposure to human rights impacts.

(C) Reports and other information from NGOs and human rights institutions

Provide further detail on how your organisation used these information sources:

We use reports and other information from NGOs and human rights institutions (for example, Walk Free's Global Slavery Index) to inform us of high risk or potential instances of human rights exposure.

(D) Country reports, for example, by multilateral institutions, e.g. OECD, World Bank

(E) Data provider scores or benchmarks

(F) Human rights violation alerts

(G) Sell-side research

Provide further detail on how your organisation used these information sources:

We engage specialist ESG sell side research to help inform us of human rights impacts in investments in general, as well as high risk or potential instances of human rights exposure in companies, sectors and geographies.

(H) Investor networks or other investors

Provide further detail on how your organisation used these information sources:

We are members of Investors Against Slavery and Trafficking Asia Pacific (IAST APAC) which provides regular education and information sharing on modern slavery.

We are also members of RIAA's human rights group, and are informed by RIAA investor toolkits including the Investor Toolkit on Human Rights and Armed Conflict; Human Rights and Climate Change – a guide for institutional investors; and Investor Toolkit – Human Rights with a Focus on Supply Chains.

(I) Information provided directly by affected stakeholders or their representatives

ESG INCORPORATION IN PORTFOLIO CONSTRUCTION

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
LE 5	PLUS	OO 21	N/A	PUBLIC	ESG incorporation in portfolio construction	1

Provide an example of how you incorporated ESG factors into your equity selection and research process during the reporting year.

EDP (decarbonisation opportunities & limited stranded asset risk): we initiated a position in integrated utility EDP in 2022, in part driven by the growing opportunity set linked to decarbonisation. The company owns a leading global renewables development platform, which has demonstrated an impressive history of value creation, as well as valuable electricity networks and strategic hydro assets. For example, we see upside to the company's current targeted annual renewable installations of over 4GW by 2025 given supportive government policies, such as the US Inflation Reduction Act and the EU Green Deal Industrial Plan. Unlike some utilities, EDP has very limited exposure to stranded asset risks – with plans to be coal free by 2025 and carbon neutral by 2030. Finally, we see management incentives being strongly aligned with these climate-related and other ESG goals, which are appropriately reflected in both long- and short-term KPIs in the current remuneration policy.

(F) We do not have a formal process to identify and incorporate material ESG risks and ESG incidents into our risk management process

o

PERFORMANCE MONITORING

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
LE 11	PLUS	OO 21	N/A	PUBLIC	Performance monitoring	1

Provide an example of how the incorporation of ESG factors in your listed equity valuation or portfolio construction affected the realised returns of those assets.

NextEra (governance & lobbying related controversies): NextEra is a Florida-based combination electric utility that derives more than half of its earnings from its regulated electric business. The company also operates an energy resources segment which is comprised of a diverse mix of assets, including contracted renewables, contracted nuclear, contracted natural gas pipelines, regulated transmission, and other energy-related businesses. We entered a small position in 1H22 after material underperformance driven by macro-related factors and company-specific factors, including the CEO's retirement, solar supply chain issues, and Florida media allegations around potential state and federal campaign finance law violations. We exited our position in 2H22 after a strong run.

The decision was made on the basis of valuation, but also due to increasing concerns from a governance perspective. The company's regulated electric business began facing greater media attention around the company's political dealings, including allegations around potential attempted bribery of public officials, hidden campaign contributions, funding of ghost election candidates, amongst other issues. Importantly, the stock price had run to a level that we believed did not sufficiently remunerate us for these risks. We believe it is extremely important to monitor the political spending and lobbying practices of US utilities as their remuneration frameworks are intertwined with legislation and regulation. We place a high bar on our portfolio companies due to the business, reputational, and legal risks involved.

DISCLOSURE OF ESG SCREENS

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
LE 12	CORE	OO 17 LE, OO 21	N/A	PUBLIC	Disclosure of ESG screens	6

For all your listed equity assets subject to ESG screens, how do you ensure that clients understand ESG screens and their implications?

- (A) We share a list of ESG screens
- (B) We share any changes in ESG screens

(C) We explain any implications of ESG screens, such as their deviation from a benchmark or impact on sector weightings

(D) We do not share the above information for all our listed equity assets subject to ESG screens

(1) Capital allocation activities used

(2) Explain through an example EP to insert example on voting against Boards with <30% female representation

STEWARDSHIP WITH INVESTEES

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SO 8	PLUS	SO 5	N/A	PUBLIC	Stewardship with investees	2

During the reporting year, how did your organisation use stewardship with investees to take action on sustainability outcomes, including preventing and mitigating actual and potential negative outcomes?

(A) Across all sustainability outcomes

(1) Describe your approach

(2) Stewardship tools or activities used

(3) Example

(B) Sustainability Outcome #1:

(B) Sustainability Outcome #1: NZAM AUM commitment

(1) Describe your approach Undertaking engagements, casting proxy votes to influence outcomes, working directly with portfolio companies' management teams, targeting low carbon and transitioning companies, and by excluding those investing capex in greenfield thermal coal projects.

(2) Stewardship tools or activities used	(1) Engagement (2) (Proxy) voting at shareholder meetings (7) Working directly with portfolio companies and/or real asset management teams
------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------

(3) Example	<p>Progress made by portfolio-holding Vopak in developing an interim emissions target to support its commitment to net zero emissions. Our engagement with management and board helped drive strengthened climate risk disclosure, more detailed emissions reduction and importantly progress on emission targets including the reductions in Scope 1 and 2 committed by 2030.</p>
-------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

(C) Sustainability Outcome #2:

(C) Sustainability Outcome #2:	ASFF revenue alignment with sustainability themes
--------------------------------	---------------------------------------------------

(1) Describe your approach	<p>Through our investments in listed equities we allocate capital to companies we believe can deliver positive environmental or social outcomes aligned to one or more of our sustainable investment themes. Investments are assessed through negative and positive screening alongside fundamental valuation and analysis including integration of environmental, social and governance (ESG) risks and opportunities.</p>
----------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

(2) Stewardship tools or activities used	(1) Engagement (2) (Proxy) voting at shareholder meetings (7) Working directly with portfolio companies and/or real asset management teams
------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------

(3) Example	<p>We engage with companies held in the portfolio to press for improved environmental or social performance in areas that we assess to be beneficial to real world outcomes. Examples of engagement objectives for companies held in the portfolio over the last year include:</p> <ul style="list-style-type: none"> • National Australia Bank Ltd (NAB): MBA requested setting and disclosure of sectoral decarbonisation targets for financed emissions. • ANN: (i) Seek response to modern slavery allegations; and (ii) request disclosure and targets on Scope 3 emissions. • COL: Seek further detail on approach to sustainable food systems • SGP: Provide input on the company's climate strategy, with a particular focus on SGP's long-term targets and medium-term strategy to achieve net-zero.
-------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

(D) Sustainability Outcome #3:

(D) Sustainability Outcome #3: Board gender diversity (minimum 30% women on boards)

(1) Describe your approach
It is our policy to use our voting proxy to uphold good governance principles, including in the area of gender diversity. We support boards that have a commitment to at least 30% female representation. If a board is operating in an industry or region which would reasonably be expected to achieve this balance and has no formal policy or committed pathway to achieve it, we may not support the re-election of male directors.

(2) Stewardship tools or activities used
(1) Engagement
(2) (Proxy) voting at shareholder meetings

(3) Example
Domain Holdings Australia: we voted against both of the male directors up for re-election as we were disappointed that the percentage of women on the board had not increased over a five-year period.

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SO 9	PLUS	SO 5	N/A	PUBLIC	Stewardship with investees	2

How does your organisation prioritise the investees you conduct stewardship with to take action on sustainability outcomes, including preventing and mitigating actual and potential negative outcomes?

(A) We prioritise the most strategically important companies in our portfolio.

Describe how you do this:

We run a concentrated high conviction portfolio and target engagement with the companies where we have larger position holdings in order to more effectively manage risk and influence outcomes.

Select from the list:

- 1
- 3
- 4

(B) We prioritise the companies in our portfolio most significantly connected to sustainability outcomes.

Describe how you do this:

We assess the companies that are most exposed to identified risks that may prevent them achieving our desired sustainability outcomes, and work with them with a view to influencing identified sustainability outcomes and fostering change in areas most readily achieved.

Select from the list:

- 2
- 3
- 4

- (C) We prioritise the companies in our portfolio to ensure that we cover a certain proportion of the sustainability outcomes we are taking action on.
- (D) Other
