Overview

The Maple-Brown Abbott Australian Small Companies Fund (the Fund) is actively managed and is primarily invested in companies listed (or expected to be listed) on an Australian securities exchange which, at the time they are first invested, are not included in the S&P/ASX 100 Index and have a minimum market capitalisation of \$100 million. We believe that company earnings drive share prices over the medium-term. We use a disciplined fundamental research process to identify undervalued companies where we have conviction in medium-term earnings delivery. We focus on earnings-based valuations, assessment of how sustainable a company's business model is and consideration of earnings risk. We believe that this focus can deliver strong and consistent returns over the long-term. Given the breadth of the Australian small companies market, we believe companies with this profile can be found at any point in the market cycle. We typically hold 30-50 stocks which score well on combined earnings-based valuation and sustainability of business measures, with the focus on diversification and stock specific risk management.

Performance (%)³

	Fund ⁴	Benchmark ⁵
1 month	-1.7	-2.8
3 months	0.0	-1.5
1 year	19.7	7.3
2 years p.a.	16.8	7.6
Since inception p.a. (24 June 2022)	19.1	8.8

Capture ratios – upside and downside⁶

Past performance is not a reliable indicator of future performance.

Average monthly performance in rising markets⁶

Past performance is not a reliable indicator of future performance.

Average monthly performance in falling markets⁶

Past performance is not a reliable indicator of future performance.

All weather portfolio

Capture ratios measure a portfolio's return versus its performance benchmark during upward and downward market trends. In up markets, an upside capture ratio above 100% indicates a portfolio has outperformed its performance benchmark during periods of positive market returns. A downside capture ratio below 100% indicates a portfolio has outperformed during periods of negative market returns.

The Fund's upside capture ratio of 100% shows Fund performance has typically kept pace with benchmark performance during periods of up markets. The Fund's downside capture ratio of 51% shows the Fund has historically outperformed the benchmark by a significant margin during down markets.

These measures are indicators of a diverse, all-weather portfolio that is achieving its aim of delivering consistent results across market conditions and reflects the importance we place on risk management by aiming to minimise downside risk while participating in the upside.

Notes

- Additional fees and costs may also apply in relation to an investment in the Fund. For a full description of the fees and costs refer to the Fund Product Disclosure Statement ("PDS") and Additional Information Booklet ("AIB") for the Fund.
- The performance fee is 15% of the Fund's outperformance of the Benchmark in respect of the performance period (which ends on the last business day of June each year) net of the management fee and costs. The performance fee is calculated daily and reflected in the unit price and deducted from the Fund annually at the end of each performance period or on withdrawal.
- Source: Maple-Brown Abbott Ltd, S&P as at 28 February 2025.
- The Fund's performance is based on the movement in net asset value per unit plus distributions and is before tax and after all fees and charges. Imputation credits are not included in the performance figures.
- The benchmark is S&P/ASX Small Ordinaries Total Return Index.
- Source: MBA, data since inception of the MBA Australian Small Companies Fund (24 June 2022) to 28 February 2025. Benchmark is the S&P/ASX Small Ordinaries (Total Return) Index. Performance is based on the movement in net asset value per unit plus distributions and is before tax and after all fees and charges. Imputation and foreign income tax offsets are not included in the performance figures.
