Overview

The Maple-Brown Abbott Australian Value Opportunities Fund (the “Fund”) is invested in companies listed (or expected to be listed) on an Australian securities exchange and is actively managed. Our value-based investment philosophy underlies our approach to stock selection, driven by our bottom-up research process designed to maximise the opportunities to deliver income and long-term capital growth to our clients. We use several valuation screens to rank our investment universe and generate stock ideas. Our experienced team then undertakes detailed quantitative and qualitative analysis to identify companies that are trading at a discount to our assessment of their underlying value. The Fund is managed on a ‘benchmark unaware’ basis and provides exposure to a diversified portfolio of our highest conviction opportunities which we expect to deliver strong risk-adjusted returns over the long-term. We aim to invest in a combination of large, mid and small capitalisation stocks from across the available universe of Australian companies and will typically hold 25–40 stocks.
