Overview

The Maple-Brown Abbott Global Emerging Markets Equity Fund (the "Fund") is invested in companies listed (or expected to be listed) across global emerging and frontier markets and is actively managed. We may also invest in companies listed outside global emerging and frontier markets that generate a significant portion of their value or sales from these markets. Core to our belief is the need to focus on both structural and cyclical change as the driver of cash flow, valuations, and ultimately, longer term share price returns. By placing change at the core of our philosophy, we seek to better identify and understand these shifts and how they will play out over our multi-year investment horizon. We believe the ideas capable of having the biggest impact are found at the intersection of our focus on change, our bottom-up, in-house industry research and our proprietary screen. The Fund provides exposure to a concentrated portfolio of companies purchased at a discount to our assessment of their long-term value. We construct the portfolio with our highest conviction stock ideas from across the universe of global emerging market equities and will typically hold 30–40 stocks.
