Overview

The Fund is actively managed and is primarily invested in companies listed (or expected to be listed) on an Australian securities exchange which, at the time they are first invested, are not included in the S&P/ASX 100 Index and have a minimum market capitalisation of \$100 million. We believe that company earnings drive share prices over the medium-term. We use a disciplined fundamental research process to identify undervalued companies where we have conviction in medium-term earnings delivery. We focus on earnings-based valuations, assessment of how sustainable a company's business model is and consideration of earnings risk. We believe that this focus can deliver strong and consistent returns over the long-term. Given the breadth of the Australian small companies market, we believe companies with this profile can be found at any point in the market cycle. We typically hold 30-50 stocks which score well on combined earnings-based valuation and sustainability of business measures, with the focus on diversification and stock specific risk management.

Notes:

1 Additional fees and costs may also apply in relation to an investment in the Fund. For a full description of the fees and costs refer to the Fund Product Disclosure Statement ("PDS") and Additional Information Booklet ("AIB") for the Fund.

2 The performance fee is 15% of the Fund's outperformance of the Benchmark in respect of the performance period (which ends on the last business day of June each year) net of the management fee and costs. The performance fee is calculated daily and reflected in the unit price and deducted from the Fund annually at the end of each performance period or on withdrawal.

3 Past performance is not a reliable indicator of future performance. Source: Maple-Brown Abbott Ltd, S&P as at 31 March 2024.

4 The Fund's performance is based on the movement in net asset value per unit plus distributions and is before tax and after all fees and charges. Imputation credits are not included in the performance figures.

5 The benchmark is S&P/ASX Small Ordinaries Total Return Index.

6 Volatility is at since inception 24 June 2022. The volatility is calculated for both the Fund and Benchmark. Volatility calculation is annualised and is the standard deviation of monthly returns.
